Ben Regaya Chiheb, currently work as an Associate Professor in Higher Institute of Applied Sciences and Technology of Kairouan, Tunisia and member in Laboratory of Industrial Systems Engineering and Renewable Energy (LISIER). His main research interests are robust estimation and robust filtering, adaptive control, real time control and renewable energy optimization.

Brahmi Mahbouba is a PhD student and member in Laboratory of Industrial Systems Engineering and Renewable Energy (LISIER). Her main research interests are renewable energy optimization and real time control.

Hamdi Hichem currently works at the Electrical engineering, École Nationale Supérieure d'Ingénieurs de Tunis (ENSIT). Dr. Hichem is member in Laboratory of Industrial Systems Engineering and Renewable Energy (LISIER). His current project is 'Real-time study of a photovoltaic System and wind energy'.

Zaafour Abderrahmen received a B.Sc. in electrical engineering from the High Normal School of Technical

Education of Tunis (ENSET) in 1993. In 1995, Prof. Zaafour obtained the Master's degree in automatic control at the same university, and the Ph.D degree from the National Engineering School of Tunis in 2000; he joined the High School of Sciences and Techniques of Tunis (ESSTT) at Tunis University as an assistant professor. Now, he is a member in Laboratory of Industrial Systems Engineering and Renewable Energy (LISIER). His main research interests are approaches to robust control of uncertain systems: performances study.

Contribution of individual authors to the creation of a scientific article (ghostwriting policy)

Author Contributions: Please, indicate the role and the contribution of each author:

Example

Chiheb Ben Regaya conceived the FMSPSO-MPPT algorithm.

Chiheb Ben Regaya, Mahbouba Brahmi and Hichem Hamdi carried out the simulation using MATLAB-Simulink.

Chiheb Ben Regaya and Abderrahmen Zaafour performed the analysis.

Chiheb Ben Regaya, Mahbouba Brahmi, Hichem Hamdi and Abderrahmen Zaafour wrote the paper.

Sources of funding for research presented in a scientific article or scientific article itself
